# ABOUT

Introducing Dynarex Resp-O<sub>2</sub><sup>™</sup>, our innovative line of respiratory therapy products. Resp-O<sub>2</sub><sup>™</sup> features a comprehensive range of respiratory solutions developed by experts who understand the challenges providers face while administering proper care. Since our founding in 1967, Dynarex has been one of the industry's leaders in disposable and durable medical equipment. As your partner in the marketplace, we continue to diversify our portfolio across the entire continuum of care because the success of your business matters to us. When it comes to doing business with Dynarex, we choose to work like we're family, because We Care Like Family<sup>™</sup>.

# HEAT MOISTURE EXCHANGER FILTERS

**Heat Moisture Exchanger  
+ B/V Filter (HMEF) 1000**

**CO<sub>2</sub> PORT**

**REORDER NO. 30100**

**ADULT**

**TIDAL VOLUME**  
150-1000 mL

**RESISTANCE**  
at flow 30 L/min 0.8 cm H<sub>2</sub>O  
at flow 60 L/min 1.9 cm H<sub>2</sub>O

**DEAD SPACE**  
70 mL

**MOISTURE OUTPUT**  
250 mL 36.0 mg H<sub>2</sub>O/L  
500 mL 34.0 mg H<sub>2</sub>O/L  
1000 mL 33.0 mg H<sub>2</sub>O/L

**FILTRATION EFFICIENCY**  
Bacterial: >99.999%  
Viral: >99.99%

**WEIGHT**  
24.5 g

**CONNECTIONS**  
22M/15F-22F/15M

**PACKAGE QUANTITY**  
50/Case

Dynarex Resp-O<sub>2</sub>™ HMEFs are single-use respiratory devices designed to provide humidification and help prevent mucosal dryness during mechanical patient ventilation and other respiratory treatments. The integrated bacterial/viral filter reduces the risk of contamination and provides protection from airborne particles and microorganisms.

## Filters

Dynarex Resp-O<sub>2</sub>™ Bacterial/Viral Filters are designed to improve the safety of your facility and patients on mechanical ventilation by reducing the risk of inhaling harmful pathogens.

- Efficiently protects patient and equipment from cross-contamination
- Not made with natural rubber latex or DEHP

## Tubes/Connectors

Dynarex Resp-O<sub>2</sub>™ Flex Tube/Flex Connectors add length to vertical circuits and HMEs to help improve system flexibility and range of motion.

- Provides added flexibility to ventilator circuits
- Lightweight, pliable design
- Not made with natural rubber latex or DEHP

Dynarex Resp-O<sub>2</sub>™ Closed Suction Trach Catheters are disposable respiratory devices designed to safely remove secretions from the respiratory tract of ventilator-dependent patients. The device allows ventilation to continue during suctioning, helps prevent cross-contamination, and protects caregivers from airborne pathogens.

- Protects patient from contact with outside pathogens and prevents contamination of the surrounding environment
- Smooth, flexible tubing minimizes patient discomfort
- Pressure wiper seal helps maintain PEEP
- Flex Tube provides adjustment and flexibility to the ventilator circuit
- Designed for 24-hr, single-patient use
- Not made with DEHP

# CLOSED SUCTION CATHETERS

## ENDOTRACHEAL

Length: 54.0 cm/21.3 in

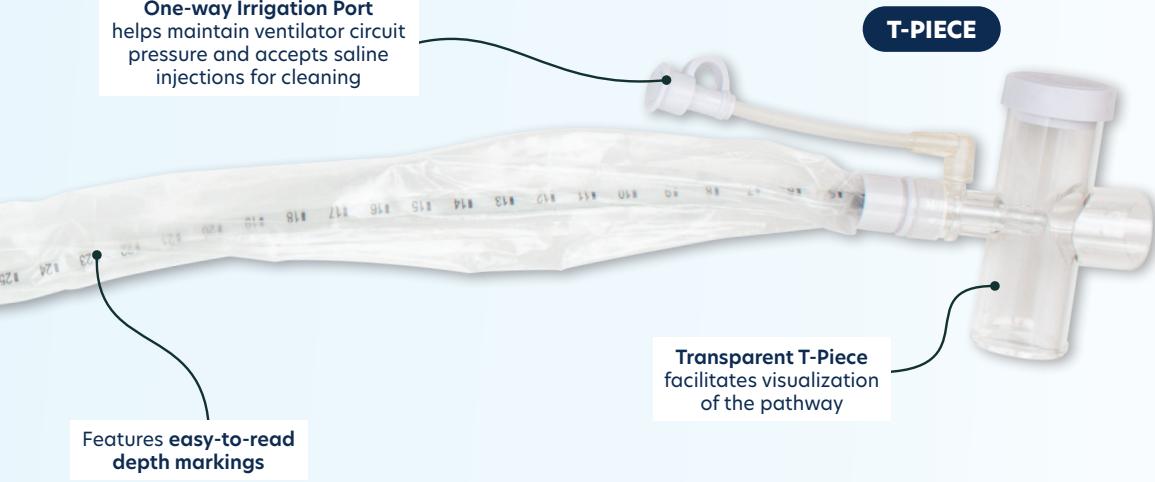

The diagram illustrates the Endotracheal Closed Suction Catheter with the following features:

- Double Swivel Elbow**: Promotes greater flexibility and movement.
- MDI Port**: Located on the catheter body.
- Thumb-control locking valve**: Provides precision control.
- Color-coded by French size**: The catheter is color-coded by French size (4.0mm (12F) to 16mm (16F)).
- High-quality outer sleeve**: Textured for maximum tactile feedback during insertion.

# OXYGEN MASKS

## Medium-Concentration

Dynarex Resp-O<sub>2</sub>™ Medium-Concentration Masks are designed to effectively deliver oxygen at a concentration rate of 40% to 50%. These masks come with light green oxygen supply tubing, designed to help improve tube visibility.

- Transparent vinyl mask features smooth edges
- Elastic strap allows for easy adjustment
- Adult and pediatric masks feature an adjustable nose clip
- Includes 7' of crush-resistant, star lumen oxygen supply tubing
- Not made with natural rubber latex or DEHP

**Includes

O<sub>2</sub> Tubing

# EtCO<sub>2</sub> NASAL SAMPLING CANNULAS

Dynarex Resp-O<sub>2</sub>™ EtCO<sub>2</sub> Nasal Sampling Cannulas with Cushion Nasal Tips are designed to help monitor exhaled carbon dioxide during respiratory treatment. Each soft, cushioned cannula features a permanent barrier between the nasal prongs so that EtCO<sub>2</sub> can be sampled from one nostril while oxygen continues to flow to the other nostril.

- Permanent barrier between nasal prongs allows for EtCO<sub>2</sub> sampling with uninterrupted oxygen delivery

- Constructed from soft materials for added patient comfort
- Crush-resistant tubing helps prevent occlusion and kinking
- Features EtCO<sub>2</sub> sampling line and O<sub>2</sub> tubing of equal length
- Transparent design allows for clear visualization
- Not made with natural rubber latex or DEHP

# OXYGEN SUPPLY TUBING

Dynarex Resp-O<sub>2</sub>™ Oxygen Supply Tubing is designed to extend a patient's reach when accessing a concentrated oxygen source for respiratory therapy. The tubing features a light green color, designed to help improve tube visibility. It comes with a standard connector on one end and either a standard or universal connector on the other.

- Crush-resistant, star lumen oxygen supply tubing
- Individually wrapped
- Not made with natural rubber latex or DEHP

# OXYGEN CONCENTRATOR & ACCESSORIES

## Oxygen Concentrator

The Dynarex Resp-O<sub>2</sub>™ Oxygen Concentrator is designed to provide supplemental oxygen to help relieve breathing difficulties in respiratory patients. The 5-liter Oxygen Concentrator includes audible alarms, oxygen purity indicator (OPI), and user-friendly flow-meter knob to provide prescribed liters-per-minute. The 37-pound concentrator is easily transportable with accessible top handle and four rolling casters.

- Features a flow range of 0.5-5 LPM
- Audible and visual alarms include Low Flow-Rate, Low/High Pressure, and Power Failure
- Manual reset button helps ensure uninterrupted oxygen delivery
- Designed for quiet operation with low noise output
- Easy-to-read control panel for optimal visibility

## Sterile Water for Inhalation

Dynarex Resp-O<sub>2</sub>™ Sterile Water supplies are disposable, single-use respiratory therapy bottles filled with water designed for patient inhalation. The water is sterilized to ensure patient safety and to help avoid cross-contamination.

- Reservoir bottles feature built-in oxygen tubing connectors
- Sterile, transparent adaptor body provides optimal visualization
- Audible alarm alerts clinician to air-flow constrictions

### Sterile Water for Inhalation, USP

PREFILLED BUBBLE HUMIDIFIER

**REORDER NO. 34300**

**SIZE**  
350 mL

**PACKAGE QUANTITY**  
20/Case (with adaptor)

### Sterile Water for Inhalation, USP

PREFILLED BUBBLE HUMIDIFIER

**REORDER NO. 34301**

**SIZE**  
550 mL

**PACKAGE QUANTITY**  
12/Case (with adaptor)

## Bubble Humidifier

The Dynarex Resp-O<sub>2</sub>™ Disposable Bubble Humidifier is designed to humidify supplemental oxygen for patients receiving oxygen therapy at home. Ideal for use with all types of oxygen concentrators with either face masks or cannulas, the Bubble Humidifier is intended for oxygen low flow rates up to 6 PSI. The transparent humidifier features clearly defined minimum and maximum lines for easy monitoring.

- Features pressure-relief valve with audible alarm for optimal safety
- Includes PVC diffuser to help minimize noise
- Disposable, single-patient use for optimal hygiene
- Not made with natural rubber latex or DEHP

### Dry Bubble Humidifier

400 mL • 6 PSI (HOME USE)

**REORDER NO. 34221**

**PACKAGE QUANTITY**  
50/Case

## Oxygen Humidifier Connectors

Dynarex Resp-O<sub>2</sub>™ Oxygen Humidifier Connectors are designed to attach dry humidifier bottles or pre-filled bubble humidifiers to continuous-flow oxygen concentrators. They come with either sturdy oxygen tubing on one end and a male threaded grip elbow on the other end, or with star lumen oxygen tubing on one end and molded threaded straight connector on the other end. Connectors are universal and fit most humidifier bottles with a DISS connection.

- Transparent oxygen tubing allows for easy visualization
- Universal fit connects with most humidifier bottles and concentrators
- Ribbed connector provides a secure fit without damaging connection points
- Designed to attach to barb-style concentrator outlets
- Not made with natural rubber latex or DEHP

### Oxygen Humidifier Elbow Connectors with 12" Tubing

# OXYGEN CYLINDERS

Dynarex Resp-O<sub>2</sub>™ Oxygen Cylinders are premium-grade containers designed to safely and effectively store liquid oxygen for use in medical facilities and homecare settings. The Cylinders are constructed from durable, yet lightweight materials (25% to 40% lighter than steel), making them easy to carry and transport. The brushed aluminum tanks feature a clear coat finish for long-lasting protection. Resp-O<sub>2</sub> Oxygen Cylinders are available in M-6 (B), M-9 (C), M-15 (D) and M-24 (E) models to meet the specific needs of a variety of patients.

# OXYGEN REGULATORS & CYLINDER WRENCH

## Oxygen Regulators

Dynarex Resp-O<sub>2</sub>™ Oxygen Flow Regulators are designed to safely and efficiently administer and regulate the flow of oxygen to respiratory patients at adjustable flow-rate levels. The Oxygen Regulator features an anodized aluminum body with a brass core and brass-encased component parts for optimal safety and reliability. Some select models feature all-brass construction.

- Single-selector knob allows for effortless adjustment
- Features easy-to-read flow-rate dial
- Brass core construction provides increased safety and reliability
- 36350-36361: Comply to CGA 870 standard
- 36370-36374: Comply to CGA 540 standard
- Not made with natural rubber latex or DEHP

## Cylinder Wrench

The Dynarex Resp-O<sub>2</sub>™ Oxygen Cylinder Wrench is designed for use with CGA 870-style cylinders to open and close oxygen-tank valves efficiently and safely. The wrench is constructed from strong, durable plastic and ergonomically crafted to effectively manage a variety of cylinders with minimal exertion.

- Sturdy, break-resistant plastic provides reliable, long-lasting performance.
- Ideal for use in a variety of medical settings, long-term care, and homecare
- Sleek, streamlined design allows for quick and easy adjustments.
- Not made with natural rubber latex or DEHP

Dynarex Resp-O<sub>2</sub>™ Fingertip Pulse Oximeters are premium-quality, non-invasive devices designed to effectively measure pulse rate (PR) and blood oxygenation levels (SpO<sub>2</sub>). The Pulse Oximeters are designed to fit fingertips comfortably and securely and feature easy-to-read displays for optimal visibility. These compact Oximeters are lightweight and feature a convenient lanyard for easy portability.

- Designed to provide effective measurement of pulse rate and blood oxygenation levels
- Large font display allows for accurate reading
- Constructed from durable materials for reliable performance
- Includes convenient lanyard for easy portability
- 36400: Suitable for all ages
- 36401: Suitable for ages 12 and up; Features Tuya App Bluetooth capabilities

# STERILE SALINE AND WATER

Dynarex Resp-O<sub>2</sub>™ Sterile Saline and Water supplies are disposable, single-use respiratory therapy bottles/vials filled with water or saline solutions designed for patient inhalation or device irrigation. The water and saline solutions are sterilized to ensure patient safety and to help avoid cross-contamination.

## Sterile Water for Irrigation, USP & Sterile Normal Saline

- Suitable for suctioning and irrigation
- Not suitable for injection

## Sodium Chloride Inhalation Solution, USP – 0.9% Unit Dose Vials

- Provides humidification of respiratory mucosa and helps prevent dryness
- Tamper-proof, color-coded vials allow for effortless identification
- Graduated markings allow clinicians to control dosage by the drop or milliliter (mL)

## Prefilled Sterile Water for Inhalation, USP – Nebulizers

- Transparent container allows for quantity view
- Packaged in a convenient bottle with an easy snap-off cap

## Sterile Water for Inhalation, USP – Prefilled Bubble Humidifier with Adaptor

- Reservoir bottles feature built-in oxygen tubing connectors
- Sterile, transparent adaptor body provides optimal visualization
- Audible alarm alerts clinician to air-flow constrictions

FACE TENT MASK

# TRACHEOSTOMY MASK

## with Swivel Tubing Connector

Dynarex Resp-O<sub>2</sub>™ Tracheostomy Masks are designed to help administer aerosol medications and oxygen to tracheostomy patients during respiratory therapy. The collar-style masks feature swivel connectors that allow for access from either side of the patient.

- Collar-style mask features smooth edges
- Non-constricting, adjustable neckband features a snap-closure for easy removal
- Swivel connector accepts 22 mm aerosol corrugated tubing
- Not made with natural rubber latex or DEHP

# DISPOSABLE WATER TRAPS

## Y-Cap

**dynarex**  
**Resp-O<sub>2</sub>**™

The Dynarex Resp-O<sub>2</sub>™ Disposable Water Trap is designed to seal off excess moisture and gasses during oxygen therapy and prevent them from backing up into tubing. The Water Trap features a threaded collection jar and self-sealing Y-shaped lid to ensure that circuits remain clear and unobstructed.

- Designed to trap liquids and help prevent obstructions in corrugated/circuit tubing
- Features threaded jar and Y-sealing lid to ensure uninterrupted flow
- Constructed from high-quality plastic materials for optimal reliability
- Not made with natural rubber latex or DEHP

# SMALL VOLUME NEBULIZER 6 CC CUPS

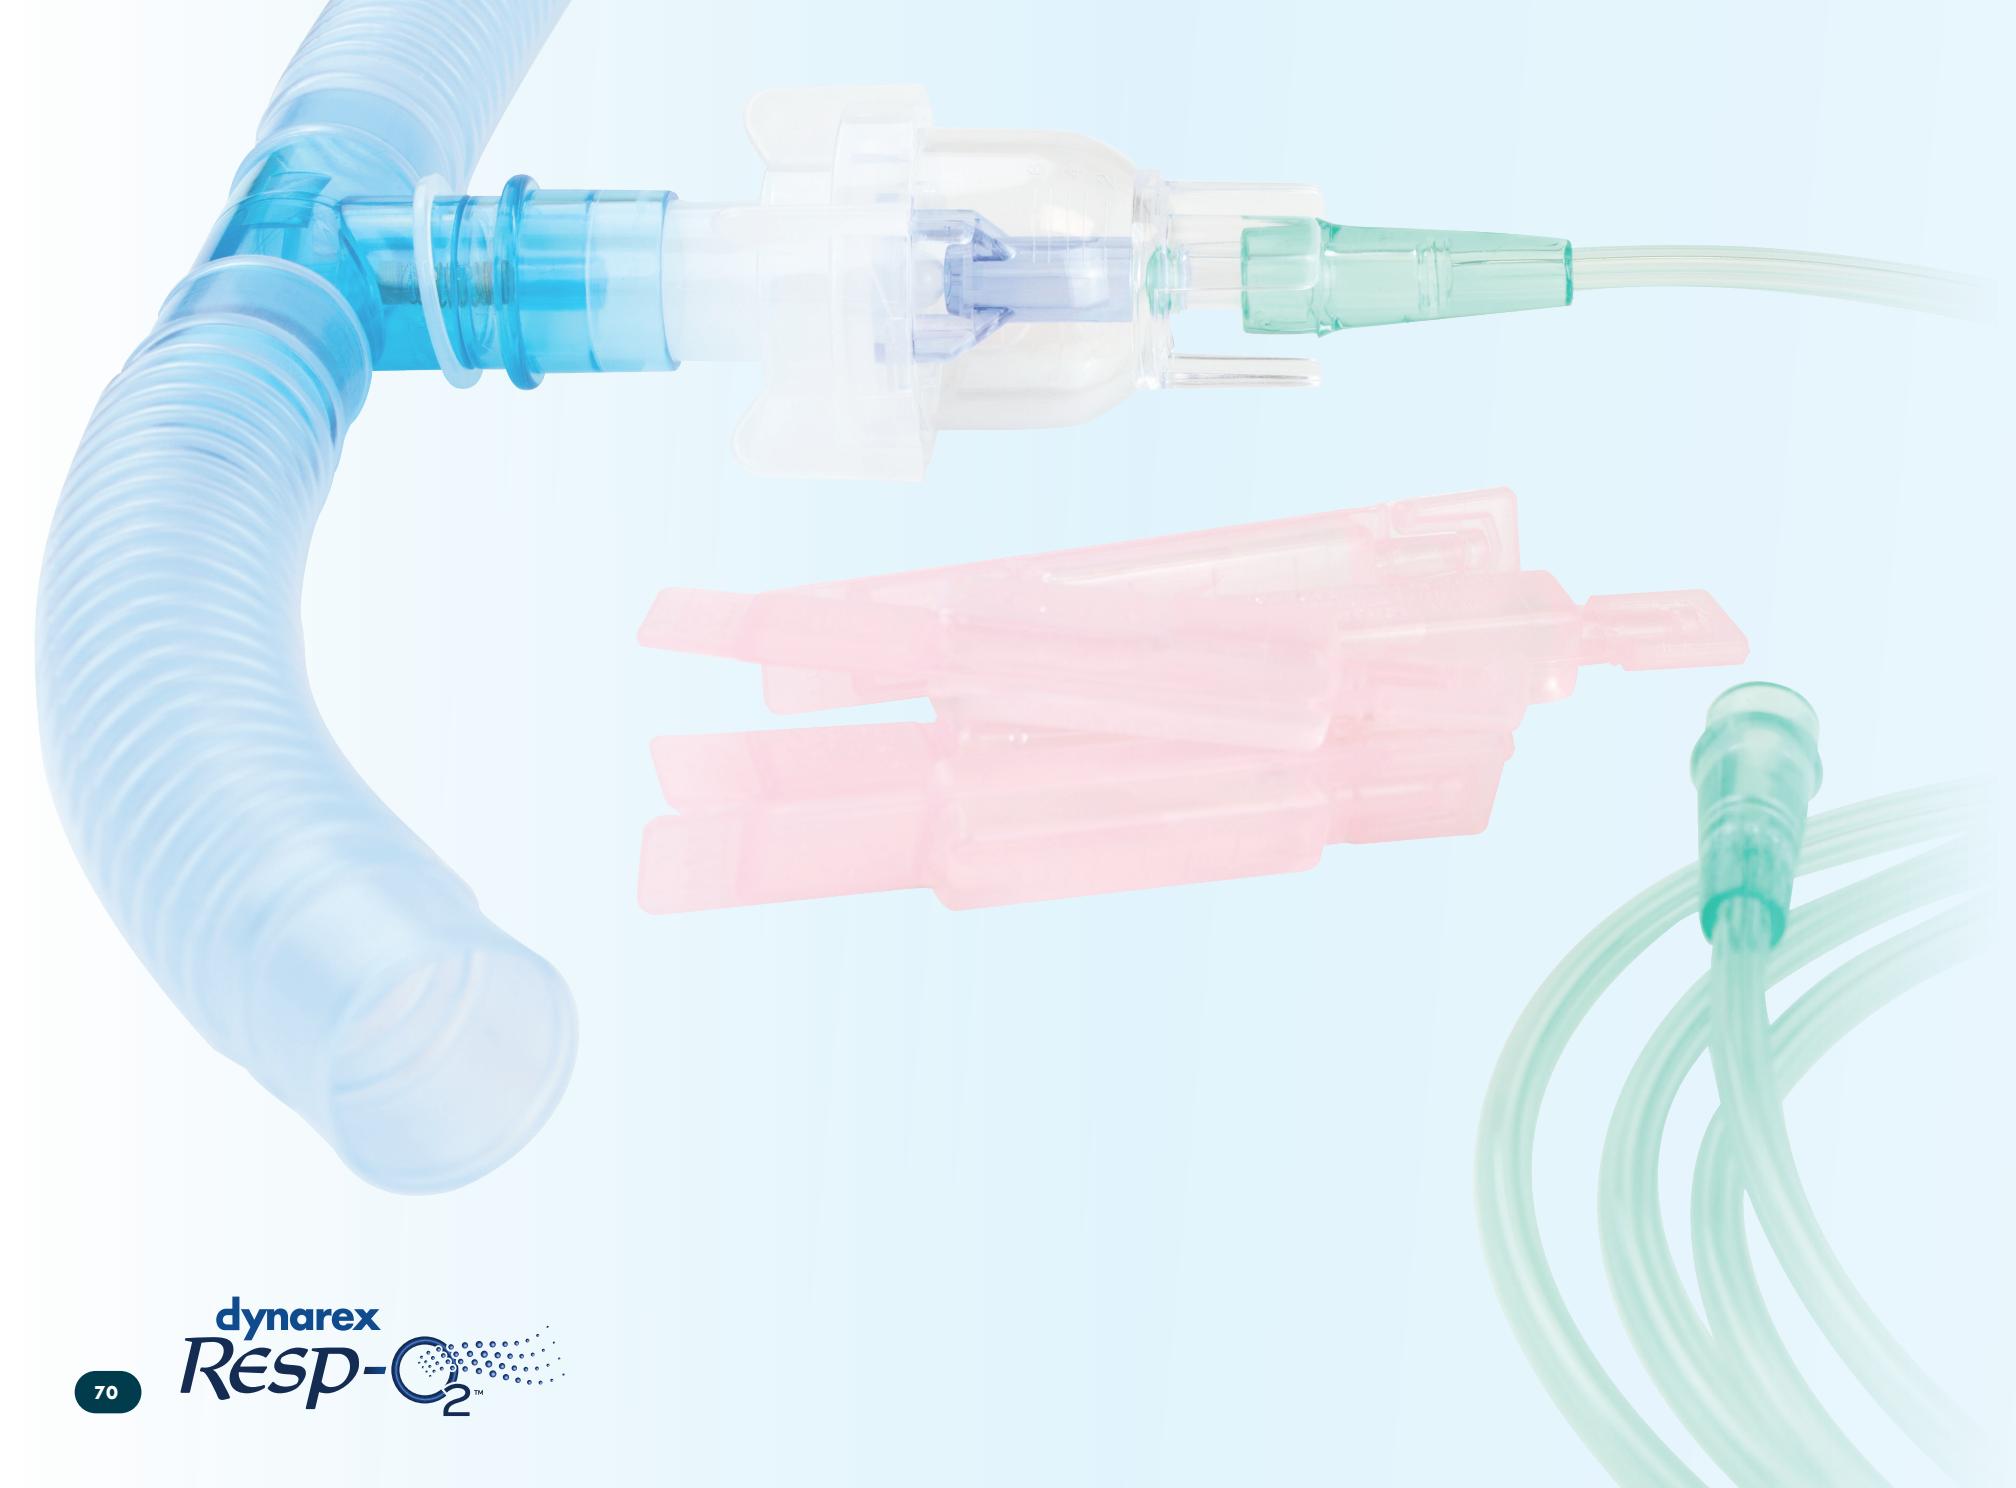

Dynarex Resp-O<sub>2</sub>™ Small Volume Nebulizer Cups are an integral part of the nebulizing process, in which liquid medication is transformed into an inhaled mist to aid in respiratory therapy treatments. The cups feature an anti-spill design that allows patients to receive treatments upright or at an angle.

- Effectively delivers medication at angles up to 90°
- Features a threaded cap to help prevent leaks
- Disposable cup capacity: 6 mL
- Suitable for hand-held and table-top nebulizers
- Not made with natural rubber latex or DEHP

Dynarex Resp-O<sub>2</sub>™ Spring Loaded T-Adaptors are designed to be used in conjunction with a small volume nebulizer (SVN) to help deliver aerosol medication to respiratory vent patients. The T-Adaptor features a spring-loaded valve that opens and closes the nebulizer circuit during insertion and removal.

- Eliminates the need to break the ventilator circuit between treatments
- Ventless design prevents medication leakage
- Accepts most standard aerosol tubing/ventilator circuit
- Not made with natural rubber latex or DEHP

# PEDIATRIC COMPRESSOR NEBULIZERS

Dynarex Resp-O<sub>2</sub>™ Pediatric Compressor Nebulizers are lightweight medical devices, specifically designed for children, that allow for the easy inhalation of prescribed medication. These adorable, child-friendly designs help caretakers manage children's respiratory disorders easily and effectively.

- Small Volume Nebulizer (SVN)
- Converts liquid medication into an aerosol mist for easy inhalation
- Quiet operation levels
- Includes reusable nebulizer cup
- Not made with natural rubber latex or DEHP

# 50 PSI COMPRESSOR & ACCESSORIES

## 50 PSI Compressor

The Dynarex Resp-O<sub>2</sub>™ 50 PSI Compressor is a top-quality respiratory device, engineered to efficiently deliver high-pressure compressed air on a continuous basis. The powerful Compressor is designed to administer humidified air or aerosolized medication into patients' airways to aid in the treatment of respiratory conditions. The Compressor is easy to clean and features a sleek, lightweight design for convenient portability. The Compressor features an oil-less piston motor for quiet, low-vibration operation. The Dynarex Resp-O<sub>2</sub>™ Compressor includes a U-shaped DISS adaptor for optimal connectivity.

- Powerful compressor delivers high-pressure compressed air for extended periods of time
- Designed to efficiently deliver humidified air or aerosolized medication
- Sleek, lightweight design (14.9 lb.) allows for optimal portability
- Oil-less piston motor provides quiet, low-vibration operation (noise level of <49.5 dB)
- U-shaped DISS adaptor for optimal connectivity
- Includes two extra air intake filters for added convenience
- Easy to wipe clean for optimal hygiene
- Ideal for use with heated nebulizers, humidifier/nebulizers, and mist tents

50 PSI Compressor

## Large Volume Nebulizer

The Dynarex Resp-O<sub>2</sub>™ Large Volume Nebulizer is engineered for safe and effective administration of humidified gas in concentrations ranging from 28 percent to 98 percent. The Nebulizer bottle is constructed from high-quality, break-resistant plastic for optimal durability. The empty Nebulizer Bottle is designed for use with clinician-provided water, offering an economical alternative to pre-filled humidifier bottles. The Nebulizer Bottle is equipped with a Venturi-style entrainment ring with an incremental dial for setting oxygen concentrations. The transparent bottle features clear marking for easy monitoring of water levels.

- Designed to efficiently deliver humidified gas for respiratory therapy
- Constructed from break-resistant plastic for optimal reliability
- Venturi-style entrainment ring with incremental dial for adjusting oxygen concentrations
- FIO<sub>2</sub> settings are adjustable from 28% to 98%
- Transparent plastic design provides optimal visibility of contents
- Clearly marked water levels for quick and easy monitoring
- Not made with natural rubber latex or DEHP

## Corrugated Tubing

Dynarex Resp-O<sub>2</sub>™ Corrugated Tubing is designed to help administer nebulized medication during aerosol therapy and intermittent positive pressure breathing (IPPB) therapy. This high-quality respiratory tubing is designed from premium vinyl materials for optimal durability. The flexible, lightweight tubing features tapered cuffs on both ends for secure attachment to standard 22mm connections. The disposable Tubing is conveniently segmented every six inches to allow for accurate cutting and sizing. The Tubing features a blue tint design to allow for easy monitoring of condensation build-up. The Tubing is available in 6-foot and 100-foot lengths to suit a variety of needs.

- Designed to help administer aerosol and IPPB applications
- Crafted from high-quality vinyl materials for optimal durability
- Flexible and lightweight for convenient handling
- Tapered cuffs attach to standard 22mm adapters for a secure fit
- Segmented every 6 inches for accurate cutting and sizing
- Blue tint allows for easy visualization of condensation build-up
- Disposable, single-patient use for optimal hygiene
- Available in 6-foot and 100-foot lengths to suit a variety of needs

# SINGLE SUCTION CATHETERS

Graduated with Control Valve  
Coiled Packed

Dynarex Resp-O<sub>2</sub>™ Single Suction Catheters are designed to safely and effectively remove secretions from the respiratory tract of tracheostomy patients. The soft, flexible Catheter with beveled tip is gentle on delicate mucosal tissue yet firm enough to allow for catheter rotation. The Catheter includes a vented cap port for enhanced suction control and two staggered eyelet openings to increase suctioning effectiveness and reduce patient trauma.

- Soft, pliable catheter with beveled tip provides optimal patient comfort
- Vented cap with control valve allows for greater procedural control
- Catheter tip is designed with 2 staggered eyelet openings for maximum suctioning efficiency
- Catheter features easy-to-read depth-number markings
- Coil packed for compact storage
- Sterile, single-patient use
- Not made with natural rubber latex or DEHP

# SUCTION CATHETER KITS

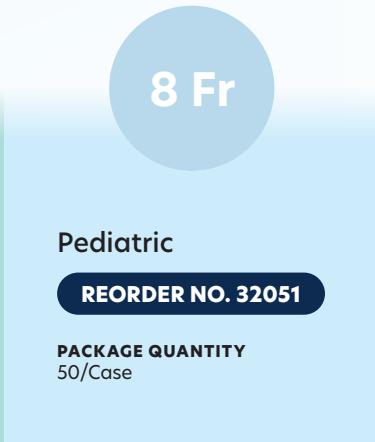

## CONTENTS:

- Graduated Catheter with Control Valve
- Pair of Powder-Free Vinyl Exam Gloves
- Pop-Up Basin

Dynarex Resp-O<sub>2</sub>™ Single Suction Catheter Kits are designed to safely and effectively remove secretions from the respiratory tract of tracheostomy patients. The soft, flexible catheter with beveled tip is gentle on delicate mucosal tissue yet firm enough to allow for catheter rotation. The catheter features a vented cap control valve for enhanced suction control and two staggered eyelet openings to increase suctioning effectiveness and reduce patient trauma. Each Kit includes a pop-up basin to hold irrigation fluids and a pair of powder-free vinyl exam gloves.

- Kit includes pop-up basin and exam gloves for added convenience
- Soft, pliable catheter with beveled tip provides optimal patient comfort
- Vented cap with control valve allows for greater procedural control
- Catheter tip is designed with 2 staggered eyelet openings for maximum suctioning efficiency
- Catheter features easy-to-read depth-number markings
- Sterile, single-patient use
- Not made with natural rubber latex or DEHP

# SUCTION CATHETER MINI-KITS

## CONTENTS:

- Graduated Catheter with Control Valve
- Pair of Powder-Free Vinyl Exam Gloves
- Mini-Tray

Dynarex Resp-O<sub>2</sub>™ Suction Catheter Mini-Kits are designed to safely and effectively remove secretions from the respiratory tract of tracheostomy patients. The soft, flexible catheter with beveled tip is gentle on delicate mucosal tissue yet firm enough to allow for catheter rotation. The catheter includes a vented cap control valve for enhanced suction control and features two eyelet openings for increased suctioning effectiveness with minimal patient trauma. Each Kit also features a mini-tray to hold irrigation solutions and a pair of powder-free vinyl exam gloves.

- Convenient Mini-Kit includes a pair of vinyl exam gloves and mini-tray to hold irrigation fluids
- Soft, pliable catheter with beveled tip provides optimal patient comfort
- Vented cap with control valve allows greater procedural control
- Catheter tip is designed with 2 staggered eyelet openings for maximum suctioning efficiency
- Catheter features easy-to-read depth-number markings
- Sterile, single-patient use

# SLEEVED SUCTION CATHETER KITS

## CONTENTS:

Graduated Sleeved Catheter with Control Valve  
Pop-Up Basin

Dynarex Resp-O<sub>2</sub>™ Sleeved Suction Catheter Kits are designed to safely and efficiently remove secretions from the respiratory tracts of tracheostomy patients. The soft, flexible catheter with beveled tip is gentle on delicate mucosal tissue yet firm enough to allow for catheter rotation. Each catheter is contained in a plastic sleeve to provide a protective layer between the patient and clinician. Each Kit includes a pop-up basin to hold irrigation fluids.

- Protective sleeve helps prevent the risk of cross-contamination
- Convenient Kit includes a pop-up basin to hold irrigation fluids
- Soft, pliable catheter with beveled tip provides optimal patient comfort
- Vented cap with control valve allows for greater procedural control
- Catheter tip is designed with 2 staggered eyelet openings for maximum suctioning efficiency
- Catheter features easy-to-read depth number markings

# SUCTION CONNECTING TUBING

## Non-Conductive • with Male Connector

Dynarex Resp-O<sub>2</sub>™ Suction Connecting Tubing is designed to provide secure connections to both portable and in-wall suction sources. This non-conductive Tubing features female connectors on both ends and includes an optional male (straw) adapter for additional attachments.

- Designed to connect suction sources to suction catheters and yankauers
- Constructed from transparent material for clear visualization during suctioning
- Durable, crush-resistant tubing
- Single-use and disposable
- Not made with natural rubber latex or DEHP

# YANKAUER SUCTION HANDLES

Dynarex Resp-O<sub>2</sub>™ Yankauer Suction Handles are designed to safely and effectively remove particulates and fluids from patients' airways. The curved, one-piece Handle is constructed from transparent materials for clear visualization, and features a slip-resistant, ribbed design to ensure a secure connection to suction tubing.

- Designed to clear airways to help improve ventilation and oxygenation
- Constructed from shatter-resistant plastic materials
- Available in vented, non-vented, bulb-tip, and straight-tip designs
- Sterile, single-use, and disposable for optimal hygiene
- Not made with natural rubber latex or DEHP

# DISPOSABLE SUCTION CANISTERS

Dynarex Resp-O<sub>2</sub>™ Disposable Suction Canisters are designed to safely and effectively collect and contain aspirated secretions from patients in medical settings. The Canisters feature an ultrasonically welded shut-off valve to help prevent overflow and cross-contamination. These versatile Canisters are adaptable for use with floor, cabinet, or wall-mounted units. Each disposable, single-use Canister comes with a convenient lid equipped with a pour spout, vacuum, and patient port.

- Constructed from high-quality, durable polymer materials
- Port caps are engineered to create a snugger seal to prevent vacuum loss
- Transparent canister features easy-to-read gradations for accurate monitoring
- Not made with natural rubber latex or DEHP

# OUTER SUCTION CANISTERS & LINERS

## Disposable Suction Liners

Dynarex Resp-O<sub>2</sub>™ Disposable Suction Liners are designed to effectively and safely collect and contain aspirated fluids and materials. Each high-quality, durable Liner features a patient-port elbow adaptor that allows quick and easy hookup and helps prevent tubing from kinking. The Liner is ultrasonically sealed to the lid—so no assembly is needed. Suction Liners require the use of a reusable outer canister.

- Ultrasonically welded shut-off valve helps prevent overflow and contamination
- Lid comes sealed and pre-assembled with pour spout, vacuum, and patient ports
- All port caps are engineered to create an air-tight snugger seal
- Not made with natural rubber latex or DEHP

## Reusable Outer Suction Canisters

Dynarex Resp-O<sub>2</sub>™ Reusable Outer Suction Canisters are designed for holding inner-liners to safely collect and contain secretions and bodily fluids during suctioning. The rigid reusable Canister is precision-crafted from high-quality polymer materials. The Canister features a built-in bracket engineered for easy wall-mounting, and pre-attached vacuum tubing for secure connection with inner-liners.

- Features built-in adjustable on-off valve
- Clearly marked critical measure numbering
- Designed for use with disposable inner-liners
- Not made with natural rubber latex or DEHP

# HOME CARE SUCTION UNIT

## Portable • Battery Operated

The Resp-O<sub>2</sub>™ Homecare Portable Suction Unit is a premium-quality suction unit designed to provide convenient, portable suctioning for use at home or during travel. The Unit comes with a rechargeable battery as well as AC/DC power cord for optimal versatility. The Suction Unit features a maximum vacuum of  $600 \pm 20$  mm Hg and a flow range of  $22 \pm 10\%$  LPM. The Suction Unit comes fully equipped with suction bacteria filter, elbow connector, elbow tube, and 6' suction tubing. The Resp-O<sub>2</sub> Homecare Suction Unit is equipped with an easy-to-read gauge to provide precise measurements of vacuum levels when needed for pediatric patients.

- Designed for convenient, effective suctioning for home use and travel
- Features compact, lightweight design (3.6 lb.) for optimal portability
- Maximum vacuum of  $600 \pm 20$  mm Hg and a flow range of  $22 \pm 10\%$  LPM
- Equipped with suction bacteria filter, elbow connector, elbow tube, and 6' suction tubing
- Includes an 800 cc disposable suction canister
- Easy-to-read gauge for precise measurement
- Rechargeable Lithium Ion battery provides up to 50 minutes of continuous operation
- Includes AC/DC power cord for added versatility

# HOME CARE 800 cc SUCTION DISPOSABLE CANISTER KIT

The Dynarex Resp-O<sub>2</sub>™ Homecare Suction Disposable Canister Kit is designed to collect and contain aspirated secretions from patients in medical settings safely and effectively. Each Canister Kit comes equipped with the necessary components for suction therapy. The canister features an ultrasonically welded shut-off valve to help prevent overflow and cross-contamination. These versatile Kits are adaptable for use with most portable suction units. The Kit includes an 800 cc canister, 6' suction tubing, cuttable 16" silicone tubing, elbow connector, and a suction bacteria filter.

- Convenient kit includes necessary accessories for suction therapy
- Constructed from high-quality, durable polymer materials
- Port caps are engineered to create a snug seal to prevent vacuum loss
- Ultrasonically welded shut-off valve helps prevent overflow and cross-contamination
- Transparent canister features easy-to-read gradations for accurate monitoring
- Kit comes equipped with 800 cc canister, 6' suction tubing, cuttable 16" silicone tubing, elbow connector, and suction bacteria filter
- Compatible with most portable suction units
- Not made with natural rubber latex or DEHP

# SUCTION ACCESSORIES

## Sodium Chloride Inhalation Solution, USP – 0.9% Unit Dose Vials

Dynarex Resp-O<sub>2</sub>™ Sodium Chloride Inhalation Solution, USP, 0.9% Unit Dose Vials are disposable, single-use respiratory therapy vials filled with a sterile, normal saline solution (0.9% sodium chloride). The vials are designed to be used with a variety of tracheal suction systems for inhalation, nebulization, and irrigation. The saline solution is sterilized to ensure patient safety and to help avoid cross-contamination.

- Designed for safe and efficient irrigation during suction procedures
- Twist-and-pull top allows for easy opening
- Features graduations in 0.5 mL increments for accurate measurement
- Tapered tip facilitates use with a variety of tracheal suction systems for optimal adaptability

## Fluid Solidifiers

Dynarex Resp-O<sub>2</sub>™ Fluid Solidifiers are designed to be used in conjunction with suction canisters to provide safe and effective containment of biohazardous liquids. The Fluid Solidifier is formulated to quickly turn secretions into a gel, greatly reducing the risk of exposure to contaminated bodily fluids and aerosolized bloodborne pathogens. The Fluid Solidifier allows for the safe transport of infectious waste and eliminates the risk of spills and sprays.

- Formulated to safely encapsulate biohazardous liquids
- Screw-cap bottle allows for easy dispensing and secure storage
- Helps reduce turnover time between procedures by quickly solidifying waste

## Mucus Specimen Trap

The Dynarex Resp-O<sub>2</sub>™ Mucus Specimen Trap is designed for use with suction devices to safely collect specimens and trach cultures for testing and analysis. The transparent 40 cc container features clearly marked gradations in 1 cc increments for easy visualization of contents. The sterile trap includes a disposable adapter to help prevent cross-contamination, and a leak-resistant screw-on cap to help maintain a sterile pouring surface.

- Features heavy-walled, collapse-resistant tubing
- Includes threaded cap for secure seal
- Packed in a convenient, easy-peel envelope
- Includes patient label for easy identification
- Sterile trap is disposable and designed for single use
- Not made with natural rubber latex or DEHP

## Suction Canister Bracket and Suction Canister Ring

Dynarex Resp-O<sub>2</sub>™ Suction Canister Brackets and Rings are designed for use with disposable and reusable canisters for easy attachment and wall mounting. Brackets are constructed from top-grade plastic materials and Rings are made from high-quality stainless steel.

32301

Dynarex Resp-O<sub>2</sub>™ Suction Units are premium-grade medical devices designed to safely and effectively remove excess secretions and fluids from the airways of respiratory patients. These powerful suction units are easily portable and feature high-quality vacuum regulators and anti-vibration vacuum gauge settings to ensure quiet and efficient operation.

- Designed to provide vacuum levels up to 560 mmHg
- Fiber filter guards against bacteria and contaminants
- Clearly marked gauge allows for easy pressure monitoring
- Oil-less lubrication provides consistent functionality
- Includes an 800 cc disposable suction canister, tubing and bacterial filter

# TRACHEOSTOMY CARE KITS

**dynarex**  
**Resp-O<sub>2</sub>**™

Dynarex Resp-O<sub>2</sub>™ Tracheostomy Care Kits are designed to provide the essential components needed for the preparation, cleaning, and care of tracheostomy tubes. These time-saving Kits are disposable, portable, and compact for easy use and storage. The components in these fully sealed, single-use Kits are sterile and come packed in sequence of use for maximum efficiency.

- Fully sealed and sterile package and contents
- Components are packed in order of procedural use
- Disposable, single-patient use
- Not made with natural rubber latex or DEHP

## Spirometers

Dynarex Resp-O<sub>2</sub>™ Incentive Spirometers are hand-held devices designed to help improve lung function and minimize the risk of post-operative respiratory complications. The compact, durable spirometer helps motivate patients to strengthen their breathing muscles, particularly when recovering from prolonged anesthesia, surgery, or extended bed rest. The device features clear, easy-to-read markings to provide visual feedback to help patients monitor their progress.

- Adjustable indicator provides target guidelines to indicate sufficient lung exercise
- Flexible mouthpiece allows for easy adjustment and optimal comfort
- Features dual-sided, clearly marked calibrations for effortless visualization
- Compact design provides enhanced efficiency and ease of handling
- Not made with natural rubber latex or DEHP

## Peak Flow Meters

Dynarex Resp-O<sub>2</sub>™ Peak Flow Meters are hand-held monitoring devices that measure peak expiratory flow (PEF). This lightweight, durable Meter is designed to help patients track daily changes in their breathing patterns. The Dynarex Resp-O<sub>2</sub>™ Peak Flow Meter is available in Adult size (standard range 50-800 L/min) and Pediatric size (low range 50-300 L/min).

- Color-coded indicators help to track daily progress
- Easy-grip handle for steady handling
- Not made with natural rubber latex or DEHP
- Includes peak flow rate diary to track daily progress
- Disposable mouthpieces are available for added protection against bacteria and cross-contamination

# ENDOTRACHEAL TUBE INTRODUCER (BOUGIE)

Dynarex Resp-O<sub>2</sub>™ Endotracheal Tube Introducers (Bougies) are premium medical devices designed to effectively guide and support endotracheal tubes during difficult intubation procedures. The sterile Introducer is disposable and comes individually wrapped for optimal hygiene.

- Designed to guide and support endotracheal tubes into patients' airways
- Ideal for difficult intubations and "blind" intubations
- Crafted from high-quality plastic materials for optimal durability
- Features clearly visible depth markings for improved safety
- Available in Child and Adult sizes
- Disposable and individually wrapped for optimal hygiene
- Not made with natural rubber latex

# INTUBATING STYLETTES

Dynarex Resp-O<sub>2</sub>™ Intubating Stylettes are designed to facilitate safe and effective endotracheal intubations. The Stylettes feature a malleable aluminum wire encased in a plastic sheath to help reduce friction for smoother insertion and removal of endotracheal tubes.

- Designed to facilitate safe and efficient endotracheal intubations
- Malleable aluminum wire helps to guide endotracheal tube
- Plastic sheath helps reduce friction for smoother insertion and removal
- Plastic covering extends beyond aluminum wire to minimize trauma
- Available in four sizes to fit most adult and pediatric tracheal tubes
- Ideal for hospital and EMS use
- Not made with natural rubber latex

# NASOPHARYNGEAL AIRWAYS & KITS

**dynarex**  
*Resp-Q<sup>TM</sup>*

Dynarex Resp-O<sub>2</sub>™ Nasopharyngeal Airways are designed for nasal insertion to help create and maintain an open and secure airway. The Nasopharyngeal Airway features a fixed flange end for safer insertion and internal striations for optimal suctioning efficiency. The Nasopharyngeal Airway Kits include an assortment of airways in multiple sizes for optimal versatility and packets of lubrication jelly for added convenience.

# LARYNGEAL MASK AIRWAYS

## Silicone

Dynarex Resp-O<sub>2</sub>™ Laryngeal Mask Airways (LMA) are premium-quality respiratory devices designed to help open and maintain airways in unconscious patients. The Laryngeal Mask Airway features a cushioned inflatable cuff with reinforced wire coil to provide a direct, sealed route to the lungs. The Laryngeal Mask Airway is ideal for use by anesthesiologists administering general anesthesia during surgery and other medical procedures. The LMA also provides a simpler alternative to endotracheal intubation in emergency situations, allowing for relatively easy insertion and blind intubation, even by novice operators.

- Inflatable cuff fills oral pharynx to help protect airway
- Soft materials and contoured design help reduce throat irritation
- Ideal for use during the administration of anesthesia
- Allows for relatively easy placement and blind intubation
- Translucent tubing and depth marks allow for accurate placement
- Reinforced with wire coil for optimal support and reduced risk of kinking
- Single-use mask is sterile and x-ray detectable

# ORAL AIRWAYS (BERMAN TYPE)

Dynarex Resp-O<sub>2</sub>™ Oral Berman Airways are designed to aid the breathing process in unconscious patients by preventing the tongue from blocking the posterior pharyngeal wall. The Berman Airway features a dual-channel design with perforated midway openings to facilitate the insertion of suction catheters without obstructing the air passage. The Berman Airway features a smooth, curved design that contours to the shape of the pharynx for improved comfort. The Airway features a sturdy bite block for added stability and color-coding for easy size identification.

- Constructed from premium-quality polyethylene for optimal reliability
- Slotted sides allow for smooth catheter insertion without obstructing air passageway
- Midway openings help maintain passageway even during airway shifts or partial occlusions
- Smooth, non-brittle finish allows for improved flexibility and durability
- Anatomically curved design helps provide improved comfort and easy insertion
- Color-coded for easy size identification
- Individually packaged for optimal hygiene
- Not made with natural rubber latex or DEHP

# DISPOSABLE GUEDEL AIRWAYS

The Dynarex Resp-O<sub>2</sub>™ Guedel Airway is a premium-quality respiratory device designed to help open and maintain airways in unconscious patients. The Guedel Airway's curved construction helps to ensure an uninterrupted breathing process while minimizing patient discomfort. The Airways feature a durable bite block for added stability and are color-coded for easy size identification.

- Constructed from premium-quality polypropylene for optimal durability
- Designed with smooth, curved edges for improved comfort
- Reinforced bite block provides optimal stability
- Transparent design allows for effortless visualization
- Color coding allows for immediate size identification
- Individually packaged for optimal hygiene
- Not made with natural rubber latex or DEHP

# CPR PRODUCTS

Dynarex Resp-O<sub>2</sub>™ CPR Shields and Masks are designed to provide a physical barrier between the responder and patient, reducing the risk of cross-contamination during CPR. The CPR Shield features a barrier filter and one-way valve that prevents patient blowback to the caregiver throughout administration.

- Serves as a protective barrier to prevent direct contact during CPR
- Features a one-way-valve to keep blowback from reaching the rescuer
- Designed from moldable plastic to effectively seal around the nose and mouth
- Individually poly bagged and constructed from disposable materials for optimal hygiene
- Not made with natural rubber latex or DEHP
- 36021: Features convenient key-ring pouch
- 36022: All-in-one kit includes mask, optional oxygen port, vinyl gloves, and hard case
